This fan-fiction article, **The Forged**, was written by Adalwulf of Aedirn. Please do not edit this fiction without the writer's permission.

This article is an expansion based on a canon element. For canon information on this topic, follow the link to The Witcher Wiki: **Construct**.

The **Forged** are a 'race' of automatons that are powered by the elemental cores of Genies, the genies are actually the lifeforms in control but due to misinformation and the changing effect of culture, **Forged** identify themselves as the bodies, thinking about their elemental core and the Genie that resides in it as their souls.

Physiology

Forged in their adult bodies usually average over 6 feet (1.8 meters) tall and weigh over 300 pounds (140 kilograms). As an artificial species, they are made of various materials, including stone, metal, and special woods, that have been infused with elemental magic and possessed by a Genie housed in a crystal heart. Though their design can vary, they share common traits of a hinged jaw and eyes made from crystal. All **Forged** will have some built-in defenses, and many **Forged** also will wear additional armor that has been integrated into their body.

Like humanoids, **Forged** can be healed by magic and affected by mind-altering effects, but like constructs, they do not need to sleep, eat, or breathe. They are immune or resistant to poison. To rest, they enter an inert but fully conscious state.

Typically **Forged** will use four bodies through their lives with the first three typically passed down familial lines with the teenage **Forged** usually constructing their final body themselves as a right of passage until true adulthood.

Toddler- A special construct that is about the size of a human baby, that will house the Genie until it leaves the Mephit stage so it can be transferred into a **Forged** child body. Unlike other models, this one can lengthen its limbs to copy growth.

Child- Around 3 feet tall, this unit will house an Elemental Daemon for the duration of this life stage, typically a **Forged** household will have one or two child aged **Forged** at all times.

Teenager- Around 4 and a half feet tall, this unit will house an Elemental for the duration of this life stage, most of the **Forged** that people meet is at this stage as true adults are very rare.

Adult- These units are unique between individuals as the vessel is handmade by the **Forged** that will inhabit it. They are typically 6 feet tall and weigh over 300 pounds.

Abilities

- **Automaton Physiology**: A **Forged** can be considered a machine with no organic components. This allows a **Forged** to have multiple possible traits, such as disease immunity, higher processing speed, enhanced strength, etc.
  - **Attachment**: **Forged** can attach any mineral, technology, or (potentially) organic substance to themselves.
  - **Defunct Physiology**:
    - **Redundant Physiology**: The Forged lack any physical weaknesses because of their physiology.
      - **Contaminant Immunity**: Because of their physiology, the **Forged** are immune to poisons, bacteria and diseases.
        - **Disease Immunity**: Because of their physiology, the **Forged** are immune to all diseases.
      - **Digestive Expulsion Negation**: Because of their physiology, the **Forged** lack the need for defecation or urination.
      - **Energy Independence**: Because of their physiology, the **Forged** have independence from energy, having no need to eat, drink, sleep, ATP, Mitochondrion (and by extension the lack of need for calories or other units of energy). The **Forged** do not fatigue or get tired. The **Forged** can use their powers continuously/repeatedly without a

need to recharge or refill their energy.

    - **Dermal Armor**:
    - **Self-Customization**:

- **Elemental Entity Physiology**: A **Forged** is technically a Genie that is inhabiting a shell, it is usually still capable of generating its element through openings in its limbs though.
    - **Elemental Generation**:

Weaknesses

- **Dispel Magic**: It can disrupt the channels of energy inside a Forged body, making them temporarily much slower and causing their body to malfunction.
- **Dimeritium bombs**: Can disrupt the channels of energy inside a **Forged** body making them temporarily much slower and causing their body to malfunction.

Behaviors

- The **Forged** tend to live in 'clans' of related individuals. Households will usually have one or two Forged children at all times, though the period a Forged is considered a child is long by mortal race standards.
- The **Forged** can occasionally be found in the Elemental Plane related to their element, though more often than not they are found in other dimensions due to their past subservience to other more advanced races.
- **Forged** who live in the Elemental Planes tend to be more spiritual and develop quicker than **Forged** found elsewhere.
